

Key Outcomes

Second user testing session with V (user tester) confirmed **significant improvements** in clarity, navigation, and structure across homepage, profiles, explore, and resources pages. 123
Remaining work focuses on adding **back buttons**, **collapse functionality for tags**, and improving **visual hierarchy** on key pages. 345 Presentation scheduled for tomorrow. 6

Decisions Made

- **Homepage poems removed** to reduce clutter; Peter can propose alternative placements in future iterations 78
- **Accessibility widget** will use existing Center Cannot Hold implementation rather than building new one, as it already meets WCAG standards 910
- **Profile page back button** will navigate to welcome page (where user came from) rather than profiles overview page 11
- **Home button** will move to navigation bar; back button (arrow) will replace home button in upper left corner 12
- **French translation** review deferred; structural feedback prioritized as most text is artist-provided 13

Feedback Received - Homepage

- **Clear improvement:** Headline text ("digital portal featuring different performances, films, and creative works") provides immediate context 23
- **Poetic instructions work well:** Phrases like "Enter, descend, explore" and "journey deeper" provide clear navigation cues while maintaining aesthetic 14
- **Risk with adding poems mid-page:** Large text blocks between categories could prevent users from knowing to scroll further; may break flow 15

Feedback Received - Profiles Page

- **Structure significantly clearer:** High-level framing → detailed biography → specific works progression makes sense 16
- **"Artist Projects" subtitle** under Living Archive helpful for understanding section purpose 17
- **Blurred/grayscale carousel edges** reduce cognitive load effectively 18
- **Back button placement good** but should return to welcome page, not profiles overview 11
- **Sentence structure improvements** on profile descriptions make artist information more scannable 19

Feedback Received - Explore Page

- **Category filtering functional** for visual arts, literature, performance (other filters still in progress) 2021

- **"See more themes" expandable** works well for progressive disclosure 4
- **Missing collapse button** for themes once expanded; users cannot minimize after opening 4
- **Media player bar** at bottom unclear for non-music content; needs context or conditional display 22

Feedback Received - Resources Page

- **Navigation significantly improved:** Clicking Creative/Organizational/Advocacy immediately shows relevant dropdown 23
- **Text hierarchy issue:** "We are interested in receiving suggestions" (large, bright) overshadows "hover and select a shape" (small, gray) instruction; should swap sizing/contrast 5
- **Close button** needs larger size and higher contrast for visibility 24
- **Vertical scrolling** within resources works well; doesn't feel overwhelming despite volume 24
- **Quote placement at bottom** makes more contextual sense as reflection after viewing content 25
- **"Back to top" button** valuable for long vertical pages 26

Feedback Received - About Page

- **Quote should come after explanatory text** rather than before, similar to resources page structure 27
- Other feedback from previous session still applies; page structure mostly unchanged 27

Pending Confirmation

- **Screen reader testing** planned using computer-based service; V recommended also testing with actual blind/low-vision users as sighted people use screen readers differently 28
- **Carousel accessibility** improved so screen readers don't trap users in infinite loop 18
- **Clickable elements** on profile pages (video details, biography links, Living Archive projects) will connect to external pages but not yet implemented 1117
- **Performance categorization** currently randomized for prototype; doesn't reflect accurate filtering from original site 20

Action Items

- **Jerwin:** Add back buttons to all pages, especially after clicking into individual performances 2930
- **Jerwin:** Implement collapse button for theme tags on Explore page 4
- **Jerwin:** Add home button to navigation bar and move back button to upper left corner 12
- **Jerwin:** Work on About page text hierarchy (explanatory text before quote) 27
- **Jerwin:** Implement changes for presentation tomorrow 30

- **Arianna:** Increase size and contrast of "Close" text on resources page 24
- **Arianna:** Swap text size/contrast for resources page instructions vs. suggestion request 5
- **Arianna:** Send email to Peter confirming user testing completion to support V's invoice 31
- **V:** Invoice Peter for user testing session payment 31

Next Steps

Final presentation tomorrow incorporating today's feedback. 6 V expressed positive assessment of work maintaining aesthetic integrity while improving accessibility and user control. 6
